

Extended Reach - Wide Grip (27gauge / 0.4 mm)

New Disposable Microforceps

Extended Reach Wide Grip (27gauge / 0.4 mm)

New Disposable Microforceps

Ref. 1286.WRD04

Developed in collaboration with
Prof. Fanis Pavlidis, Germany

“The surgical comfort and efficiency of the 27G peelings are mostly dependant on the ergonomics and stiffness of the forceps. The new Extended Reach - Wide Grip 27G forceps combines significantly increased rigidity for direct response and a wider gripping tip allowing for a reduced number of grasp actions and minimized risk of retinal trauma. In addition, the stronger end gripping tip with serrations allows for stronger grip of membranes.”

Features & Benefits in comparison with the current 27G forceps:

- 60% increased gripping width
- 260% improvement in gripping area
- 40% enhanced stiffness
